- The implementation of 2030 Agenda with respect to social, environmental and economic issues is of key significance for the future of our planet and requires the current engagement of all the inhabitants of the Earth.
- All these aspects play a special role in the context of the COVID-19 pandemic, hence the need for assessing the SDGs progress with a view to adapting activities in this area to the present circumstances.
- The visualization of the number of partnerships related to the specific SDGs (See: Fig. 1) points to large discrepancies in the number of registered partnerships, depending on the goal.

Literature studies based on research

- SDG Good Practices, Success Stories and Lessons Learned in SDG (2020);
- SDGF (2016);
- Killian S., Lannon J., Murray L., Avram G., Giralt M., O'Riordan S. (2019);
- Leal Filho W., Brandli L.L., Lange Salvia A., Rayman-Bacchus L., Platje J. (2020);
- Baumgartner R.J. (2011);
- Barbier E.B., Burgess J.C. (2020),
- Chłapek K., Krajewska S. (2020)

The analysis presented in the paper points to an insufficient level of communicating SDG-related actions, particularly at the stage of sharing and disclosing good practices.

Another issue is the lack of adequate and user-friendly measuring tools, facilitating the determination of the progress in the SDGs implementation by various stakeholders.

The paper aims to present a model for accelerating the SDGs implementation (AP model), based on the verification of good practices related to the goals as well as an analysis of COVID-19 implications.

AP model	=	0,86G1+0,87G2+0,88G3+0,79G4+0,84G5+0,88G6+0,87G7+0,78G8+0,91G9+0,92G10+0,88G11+0,84G12+0,81G13+0,62G14+0,88G15+0,89G16+0,78G17
-----------------	----------	---

The interpretation of the AP model is as follows:
if one initiative was undertaken affecting all the SDGs,
the value in the model of accelerating the SDGs implementation would reach the value of 14.3.

The major advantage of the AP model is its simplicity as a measuring tool, which serves to strengthen an entity's sense of contribution to the achievement of 2030 Agenda.

The awareness and knowledge of the impact of specific actions on the quality of life of future generations can accelerate the SDGs implementation. The conclusions presented in the paper may be put into practice by various groups of 2030 Agenda stakeholders, as well as stimulate further research at an academic level.

**SUSTAINABLE
DEVELOPMENT GOALS**
